Indoor Outdoor Exhaust Filter

Used for cooling industrial enclosures, ensuring enclosed equipment does not overheat.

Application

Ralston Outdoor Series Exhaust filters can be used for convection cooling, or used with the Outdoor Series Filter Fan for forced air cooling. Air flow will help prevent condensation build-up within the enclosure to help eliminate corrosion.

Construction

The attractive heat resistant plastic hood is fixed to the enclosure from the inside using double sided industrial adhesive tape and screws.

The washable filter mat can be easily changed from outside the enclosure through the lockable door in the hood

Finish

RAL7035 light grey

Standards

UL, cUL rated Nema type 12 & CE IP55

Features

- Weather proof & UV resistant
- Quick change removable filter included

- Impact Resistant
- Lockable outer door
