

Fiberglass-Reinforced Polyester Enclosure

APPLICATION

Ralston's RAL series enclosures are designed to provide protection indoors and outdoors against dust, dirt, oil, and water for items such as: electronic and electrical controls and pneumatic components. The RAL is well suited for corrosive environments.

CE

CONSTRUCTION

All RAL enclosures are made of fiberglass-reinforced polyester. They are exceptionally durable, corrosion resistant, can withstand abuse and exposure to chemicals, water and extreme conditions. The cover is sealed with a polyurethane gasket. Interior mounting plates are available as an option.

FINISH

This enclosure is RAL7035 light grey. Optional interior mounting plates are available in polyester or galvanized steel.

STANDARDS

The RAL is built to the requirements of NEMA type 4X for industrial use. Water-tight and corrosion resistance. The RAL enclosure is IP-55 rated.
