

Non-Metallic Pushbutton Boxes

Water, oil & dust-tight pushbutton enclosures

Application

Ralston's non-metallic pushbutton boxes are designed to provide protection against dust, dirt, oil and water for most standard water-tight pushbutton, switches and pilot lights. These enclosures are suitable for outdoor use.

Construction

The NMPB series is made from injection molded polycarbonate material. The door is pre-punched to accept 30mm or 22mm switches, pilot lights, and pushbuttons. Doors are sealed with water-tight gasket and are secured to the enclosure with non-metallic hardware to avoid corrosion.

Finish

Ralston's non-metallic pushbutton boxes are light gray (RAL-7035).

Standards

The NMPB series is cUL approved to the requirements of NEMA type 4, 4X, 6, 6P, 12 & 13 specifications and carry a UL flammability rating of UL 94 5V.
