

Non Metallic

Ralston's Non-Metallic Enclosures are designed to last in highly corrosion resistant areas. High-impact resistant, light weight, and easy to machine, our non-metallic enclosures are a cost-effective solution for all indoor and outdoor extreme conditions.

Normally used in highly corrosive environments, our Non Metallic enclosures provide a lightweight, easily machined alternative to metal. Industries we serve include Pharmaceutical, Chemical, Petroleum, Water and Wastewater, Pulp and Paper, Mass Transit.

Specially made to your exact needs, features on non metallic include:

- Corrosive resistance
- Lightweight and easily machined
- Unlimited choice of colour
- Fire retardent and non-conductive
- Meets Nema classifications
