NEMA 4, 4X Gasket Kit

NEMA 4/4X Package For Enclosure Air Conditioners

When ordered with the NEMA 4 package, the air conditioner will maintain an enclosure's NEMA 4 rating for indoor or outdoor use in a wet environment including rain, splashing, and hose directed water. The NEMA 4X package adds corrosion protection with a 304 stainless cabinet. It is recommended to include the coil protection option for NEMA 4X applications.

Part No.	Description
N4GK	To obtain type 4 rating on painted AC units. N4GK is included with stainless units

Corrosive Packaging

Corrosion protection to components against acids, solvents, salt & other corrosive environments.

Part No.	Description
CP	Ambient corrosive packaging. Baked polyester coating on condenser coil and corrosive inhibitors applied to internal piping.
CP2/3	Total environment corrosive packaging. Baked polyester coating on condenser coil and corrosive inhibitors applied to internal piping.

External Heat Output

Part No.	Description
EHO	Ability to install an external heater to be operated by the air conditioner's controls.

Alarm Output

Each air conditioner's digital control panel is equipped with an alarm indicator. Optional alarm output is the provision of wire output leads providing a dry contact signal to install optional signal and audible alarms.

Part No.	Description
X-03	Normally open/closed

Comes in signals lights, and audible alarms.
